Michael Hunt

Physics PhD and aspiring data scientist

mbh038@gmail.com | mbh038 | Michael Hunt

Currently

I have worked as a lecturer in the HE in FE sector for 19 years, having previously been a research physicist in Switzerland and France for 6 years. I have written, managed and delivered a number of HE courses up to Masters level, including a BSc Renewable Energy and Carbon Management. In the last two years I have successfully completed many (>25) MOOCs in statistical analysis, machine learning, big data and more, mainly using R, and Python but also Matlab, MS Azure and other tools. I have so far used these new skills to carry out market research, to model heat flows in old buildings, to simulate wind speed and solar variation and to model a pumped storage energy solution for a local town. The heat flow work was part of a long running collaboration with conservation officers within Cornwall Council, funded by a Townscape Heritage Initiative lottery money. It was published last year and presented at an international conference (EECHB 2016). I am now embarking on a machine learning/IoT project to develop a biologger and software to determine the state of movement of farm animals from accelerometer data alone.

Employment

1998– **Cornwall College** HE lecturer, course manager and curriculum area manager.

1997–1998 **CNRS Lab. Louis Neel** OXSEN Research Fellow, developing magnetic transistors.

1996–1997 **Physics Department, University of Zuerich** Oxygen isotope investigations of Hi Tc superconductors using dilatometry.

1995–1996 **ABB Applied Physics Group, Corporate Research Centre, Baden Daettwil** Dilatometric studies of 1 MW Hi Tc superconducting current limiter.

1995–1996 **Solid State Physics Lab., ETH Zuerich** Low temperature studies of transport properties in metals

1981–1982 **Research Centre, British Gas, Solihull, UK** Coding in FORTRAN and assembly to support gas dispersion investigations.

Education

1989–1992 **University of Bristol** PhD Physics “A de Haas-van Alphen Investigation of the heavy fermion superconductor Ce CU_2Si_2” (supervisor: Mike Springford)

1987–1988 **University of Sussex** MSc Physics by Research (Distinction)

1982–1985 **University of Cambridge** BA Natural Science (Physics)

Presentations

Talks

2016 EECHB: Life Cycle Analysis of Historic Buildings in Cornwall(EECHB, Brussels, Belgium)

Publications

I have 24 publications in peer reviewed journals, almost all dating from my years as a post-grad and post-doc 1989-1998. See my profiles on Research Gate or Google Scholar for listing of these. One was published in Nature and has over 300 citations. More recently (2016) I presented work at an international conference (EECHB, 2016) on energy efficiency in old buildings. This was an analysis carried out using R of heat flow through thick, solid walls.

Certifications

Many online courses in 2015-2016. The code written for most of these can be found in repos on my GitHub page. Most courses required between 20 and 100 hours of work over 4 - 8 weeks.

Coursera	The Data Scientist’s Toolbox	JHU	100%
Coursera	R Programming	JHU	100%
Coursera	Getting and Cleaning Data	JHU	100%
Coursera	Exploratory Data Analysis	JHU	100%
